Beschreibung

TOKSEL MULTIWIRE BLOCK-CUTTING MACHINE: MEGALODON

Megalodon which offers various wire thickness options, is first launched with 5.3mm. wires in Istanbul Marbletech fair. Thin wires provide high cutting speed and less waste of raw materials. The **precision cut** feature of the machine transforms raw stones in the quarries into high value added products.

With **hot-dip-galvanizing** and epoxy paint MEGALODON is firm in any condition. It has TOKSEL's traditional all-over-**auto lube** system as well.

Compared gang saw machines, Megalodon allows changing thickness settings more **practically** when needed. You can produce from **15 to 65 cm. slabs**, now with much higher performance with Megalodon.

Industrial Advantages of MEGALODON

- High cutting speed
- Minimum waste of raw materials
- Lower foundation expenses
- Less space
- Cuts both marble and granite
- Energy saving up to 25%
- Less need for workforce
- Able to cut slabs
